

The power of connected minds

 **BASF**
We create chemistry

Research Scientist Decorative Coating Systems (m/f)

We are the world's leading chemical company because we offer intelligent solutions for our customers and for a sustainable future. We connect and develop people with diverse talents all over the world. For you, this means a variety of ways to advance. Not only your performance but also your personality matter to us, without regard to gender, age, origin, sexual orientation, disability or belief. At BASF, careers develop from opportunities.

The employees of the BASF Coatings GmbH in Oldenburg play a central role in maintaining and expanding BASF's leading position by focusing on key technology in the construction industry as well as in other strategic areas. Working closely with our internal and external partners, we provide solutions for future success.

What you can expect

Within our unit Development Performance Flooring Europe, you will manage our development lab for decorative flooring systems.

- o You will develop new products and support our running portfolio as well as our tinting hubs.
- o You will observe the decorative flooring market and cooperate with the marketing department as well as with application technologists.
- o Furthermore, you will support our EHS specialists, certification, technical documentation and the production of existing products.
- o You will introduce new products into production, match color shades and manage the supply of our marketing team with samples.
- o You will interact with colleagues outside of Europe regarding global trends and cooperate in global projects.

What we expect

- o You have earned a Master's degree or ideally a Ph.D. degree in chemistry, chemical engineering or in a comparable field and you have already gained work experience with construction products and their application as well as in leading a laboratory.
- o You are familiar with the production of construction materials, the chemistry of reactive resins for construction (total solids and waterborne PU and Acrylics) and you have good knowledge of raw materials as well as testing methods.
- o You bring a good feeling for colors and surfaces and ideally have experience with color matching software, such as Colibri.
- o You have excellent communication skills in English for collaborating with our
